

SINGLE PISTON SAMPLE RECEIVER

SAMPLE CYLINDER TYPE 6 10K 850409

Single piston sample receiver.

With Nitrogen Cap for single phase samples.

Internal vortex mixing ring.

Flush/Evacuation port on primary side.

A.E. Right Angle Needle Valves.

Outlet ports: 1/4" NPT Female.

Valve Protection Caps.

Aluminium transportation box compulsory as part of the DOT approval.

Specification

Model:

Type 6-10 K GA-drawing 850409

Net volume: 700 ml

M.A.W.P: 690 Bar g @ 150°C
(10,000 psi @ 302 °F)

Material:

Cylinder and End cap : 17-4 ph
(AISI 630)

piston: AISI 316 Vortex ring

Net weight (kg): 22 kg (48.4 lb)

Dimensions: Length & Diameter
750 x 89 mm
(29"x 3.5")

Service:

UN 1267- Petroleum Crude Oil

UN 1075- Petroleum gases, liquefied

UN 1954- Compressed gases,
flammable, n.o.s.

UN 1971- Natural Gas, compressed

UN 1066- Nitrogen, compressed

Formation water: Water with dissolved salts in various quantities and compositions.
