

FLOW BACK TANK

The flowback tank is equipped with a gas buster to vent produced associated gas for a safe operation of the tank. The gas buster is retractable for easy transportation. The 4" piping are equipped with union caps to prevent spillage or pollution.

The flowback tank has V-bottom floors for fast and easy cleanout. The long walls are made from continuous 40' sheets of steel that require fewer weld joints. This feature greatly increases the overall strength and reduces the opportunity for leaks, cracks and hidden corrosion.

FLOW BACK TANK

Specification

Dimensions

Length (m)	:	5.90
Width (m)	:	2.44
Height (m)	:	2.80
Weight (lbs)	:	8,900
Max. W.P. (psi)	:	Atmospheric
