

BLOWOUT PREVENTER (BOP)

HYDRA RIG 10,000 Psi Blowout Preventer, Hydraulic Actuator, Quad for Coiled Tubing in accordance with API 16A.

The BOP is hydraulic operated with manual retract bonnets for ram change. The BOP is equipped with pipe rams, slip ram, shear ram and blind rams.

Indicator rods give a reliable indication of the ram position.

Shear rams cut the coil tubing leaving a clean end of circulating fluid or easy fishing.

Slip rams with replaceable Inserts to renew the teeth or change sizes.

Separate seals for hydraulic and well pressure with a vent to prevent well pressure from entering the hydraulic system.

Side port flange integral to BOP body.

QUAD BOP

Specification

Service	:	H₂S
Material	:	All well fluid wet metals to NACE, MR-01-75, Viton o-rings and seals, and PolyMyte seals.
Type	:	“CTB” QUAD
Dimension	:	3 1/16” Bore
Weight (lbs)	:	2500
Max. W.P. (psi)	:	10,000
Test Pressure (psi)	:	15,000
Hydraulic Pressure	:	1500 – 3000 psi rated working pressure
Operating Temp. Range:	:	-20°F to 250°F
